

1. How many classes are there overall?

There are 5192 total courses.

2. How many classes do you get if you put a fair attempt into de-duplicating them?

There are 4365 unique courses.

3. Which department offers the most (different) classes? Make a table of the departments and the number of classes offered by each, and put it in a separate (csv) file.

Anthropology appears to offer the most different classes. This is dependent on the sorting metric used to select a class among a series of cross-listed codes.

4. Is there an apparent difference in the number of classes offered between Autumn, Winter, and Spring quarters?

I calculated 1447 spring courses, 1361 winter courses, 1249 autumn courses, and 108 summer courses (among those that listed when they were offered).
